Yes but that will have to be later as I want to go and have some sleep.

g in your integration is structurally sound now, Bunmi — you've got a clean flow aystack and Opay. The only reasons your editor still underlines `Payment.objects`

`ayment` **model isn't imported** at the top of your views file.

on Copy

```
core.models import Payment
```

tions may not have been applied after adding the `Payment` model.

Copy

```
on manage.py makemigrations core
on manage.py migrate
```

e two are in place, the underline will disappear and Django will recognize the

---

hecklist of Your Integration

ystack initiation: correct, uses `tion_price`, saves a `Payment`
